

MCT1 Antibody

Anti-MCT-1

Catalog No.:	47-156
Host:	Rabbit
Clonality:	Polyclonal
Isotype:	n/a
Immunogen:	Peptide corresponding to aa 3-14 of human MCT-1 protein.
Purification:	Immunoaffinity chroma-tography
Species Reactivity:	Human
Tested Applications:	WB
Buffer:	PBS containing 0.02% sodium azide.
Reactivity:	This antibody recognizes human MCT- 1, a novel gene that was identified in Tcell leukemia/lymphoma cell lines having limited homology to a region of Cyclin H. MCT-1 expression results in ashortened G1 phase and increased rate of proliferation.
Storage:	MCT1 antibody can be stored at 4°C, stable for one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Note: During shipment, small volumes of the antibody will occasionally become entrapped in the seal of the product vial. For products with volumes of 200 µL or less, we recommend gently tapping the vial on a hard surface or briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the container's cap. Optimal dilutions/concentrations should be determined by the end user. The information provided is a guideline for product use. **This product is for research use only.**
