

Human Cell Array II

Cat. No.: 17-602

Ψ Specifications

SPECIES:	Human
TESTED APPLICATIONS:	ICC
APPLICATIONS:	Human Cell Array II is provided for immunocytochemical analysis of protein and protein-protein interaction. Pretreatment with 0.1% TritonX-100 for 1 minute at room temperature before applying immunocytochemistry is strongly suggested.

STORAGE CONDITIONS: Human Cell Array II can be stored for up to 3 months at 4 °C under desiccated conditions.

Ψ Background and References

BACKGROUND:	Human cell lines (HL-60, Jurkat, K-562, MOLT-4, Raji and THP-1)
